

ASSET MANAGEMENT

ARE YOUR ACCOUNTS RUNNING INTO BUDGET CONSTRAINTS.. WE CAN HELP

With the economic times affecting companies across the state, we need to be creative on how we approach customers and find solutions that will assist with their budget constraints.

Many accounts have hundreds of equipment that are replaced each year, while others simply have old equipment tucked away in closets and warehouses. Often times they don't have the manpower to pull, value and dispose/sell these assets.

Our Asset Management Solution can help. We have the ability to dispose old equipment while generating cash flow for customers to purchase new equipment.

We currently have two service offerings:

The first being Asset Logistics where we pull the inventory, stage, perform Triage and then store the obsolete systems.

The second is Asset Disposal where we destroy the hard drives on or off site, sell the assets or prepare assets for auction or sell.

DELL ICS SERVICES

Did you Know....

That Premier Logitech is a certified reseller of Dell.

We not only provide services for Dell but also have the ability to provide quotes and solutions to meet your customers needs. If you have a challenged account that you can't get into, please let us know as we would be more than happy to partner up and drive the efforts.

Let us do the work, we don't mind.
